

Myth Fact
Vaccines and You

**BEFORE MAKING DECISIONS ABOUT
VACCINATION FOR YOUR CHILD,
IT'S IMPORTANT TO GET THE FACTS.**

Get the facts by visiting www.vaccinesandyou.com

Vaccines 'teach' the body how to produce antibodies and defend against future infection.

The CDC, FDA, NIH, and other federal agencies routinely monitor vaccines and conduct research to assess their safety.

Widespread use of vaccines has eliminated or nearly eliminated some diseases in the US since the turn of the 20th century.

Myth

My child only needs school-required vaccines.

Fact

The CDC recommends vaccines for preteens — even beyond the ones required by many schools.

Myth

Most vaccines for children only help prevent mild diseases.

Fact

Many diseases can be serious. Choosing **not** to vaccinate may put your child at risk. Talk to your doctor today to learn more about the **benefits** and **risks** of vaccines.
